

Fig. 2

FIG. 10 is a perspective view of a pair of shoes 26. The shoes are shown from a side-on perspective, highlighting the heel portion 26A and the sole 26B. The sole 26B is a thick, dark, textured layer that forms the base of the shoes. The heel portion 26A is a raised, rounded section of the sole at the back of the shoes. The shoes 26 are positioned on a light-colored, textured surface.

Figure 1 is a perspective view of a semiconductor device 20. The device includes a substrate 20-1 with a top surface 20-2. A central region 40 is covered by a material 42. A peripheral region 26 is defined by a boundary 26-G. A central opening 15 is present in the substrate 20-1, with a structure 42-G located within it. The device is surrounded by a series of solder bumps 26.
